DRAFT LETTER INTRODUCTION

(Validation outchop)

From:

To: Commanding Officer/Supply Officer/3-M Coordinator

Subj: Final Results of Validation of USS _____

The attached summary and detail data reflect status of on site validation conducted during _____ period (_____ to _____). There were a total of 3165 records reviewed and noted as transactions. These records are noted as "ADDS" or "DELETES". This data has been provided to the appropriate CDM for further processing. Output from this CDM verification will be applied to the ship database and appropriate configuration and logistic records updated to reflect current installation support. Add transactions may indicate that current on board support is "insufficient" and delete transactions may indicate that current on board support is "in excess". The validation and CDM verification combination will ensure accurate and current configuration and related logistic support data is reflected in the ship database and required support provided.
